OUTDURE®

“The decision to go with Outdure really came back to not only the (surface) product, but the system behind it all. For each scenario we faced, Outdure had a solution for us, we were able to adapt QwickBuild to different circumstances”

AIDAN O'SHANNESSEY
– NINE IN SIX BUILDERS

OUTDURE® + THE BLOCK

‘Contemporary Country’ is the design theme and brief for this The Block 2022 – Respecting the landscape whilst considering features and materials of the heritage homes connected to the modern structures. The deck areas are the largest ever seen on any season and with the extreme weather conditions easy, fast installation has never been so critical.

When it comes to creating a deck for any project, it's not just about the decking boards, or as we call it at Outdure, the 'deck surface' that needs to be selected... What is equally as important is the 'deck structure' which is what the surface/s is supported by. Traditionally decks are built with timber sub-frames but when factors such as height, moisture, speed, and durability are key there are better options available, so when we talk about a 'deck' we refer to the deck surface and the deck structure or frame.

Whether you choose hardwood timber decking or composite decking boards attributes such as colour, texture and sustainability are considered in addition to benefits including longevity, value for money, ease of install, and low maintenance. You aren't just limited to boards as a surface material either, Outdure who has been the key material supplier for the variety of deck areas seen in past seasons (alfresco courtyards, rooftop spaces, pool decks, etc) also offer exterior tiles and synthetic turf as 'deck surfaces' to maximize your outdoor space.

STORM

HOUSE 1 – CONTEMPORARY BARN

When it came to the exterior living and entertaining spaces, Tom and Sarah-Jane contrasted the internal timber herringbone floors, with ResortDeck boards in Storm, a mid grey hue that tied in perfectly with the cladding of the modern pavilion. The board layout and deck design included feature 'cut-out' areas for planting to give visual interest for the expansive area for the outdoor dining and pizza oven, towards the solar-heated pool and neighbouring half basketball court. The deck edges were finished off with ResortDeck trim boards, also in Storm.

DECK SURFACE: RESORTDECK BOARDS & TRIM - STORM
DECK FRAME: QWICKBUILD FOR COMPOSITE DECKING (45X45)
DECK SIZE: 100M2

Did you know...

An excellent way to add value to a home when creating a deck area is to ensure a flush level from the inside to the outside spaces, rather than a 'step-down'. This is a key consideration to all the deck designs but can often be expensive, messy and time consuming, for example if soil needs to be excavated, or a concrete pad is needed to allow for a low deck.

Although the House 1 deck is low to the ground, it isn't at risk of rotting from moisture like it would be if it was built on a traditional timber sub-frame as the team chose Outdure's QwickBuild system with structural, marine-grade aluminium framing.

When it comes to the importance of moisture resistance, the ResortDeck range has the added benefit of being encapsulated with an UltraShield protective layer. The side of the board profile has been designed so no nails are required, instead hidden QwickClips simply twist into the structural aluminium profiles (for this low-height deck, Outdure optimised the design by using the 45mm x 45mm joist-bearers).

HOUSE 2 – MODERN LODGE

Rachel and Ryan went with a contemporary architecture style for the deck areas with plenty of details to shade the north facing wraparound verandah, they chose ResortDeck boards and trim boards in SeaSalt for a look similar to a silvered-off hardwood.

The U-shape perimeter deck with an extension to the pool area, used a staggered board layout to ensure minimal waste of materials. To echo the exterior of the house, the deck areas featured ResortDeck trim board combined with cladding for the raised deck areas to conceal the structure.

“Once the framework is in, you just lay the materials down and it locks into place. With the ResortDeck we used, that means you don’t have to stain it and never will, the finish is there from the start and the durability means it’ll stay.” RYAN

The Process with Outdure

1. GET INSPIRED

A good place to start is to research which decking surface/s suit your project... Browse our online brochures, order samples from Outdure or see product displays at our retailers.

2. FIND OUT PRICING

To get an indicative RRP price, let us know your surface/s choice, approximate deck size and shape and if you need a deck frame. Either fill in our online 'Find out Pricing' form, or simply call or email us at info@outdure.com

3. FREE 'DESIGN & PRICE' SERVICE

Either fill in our online 'Design & Price' form, or simply call us... We will ask you about your surfaces, height of deck, when you would like your project completed, and what the deck is being built on ie soil or concrete/membrane etc. Either upload or email dimensions/plan, we can also supply you a frame design free of charge

4. REVIEW YOUR DESIGN

From your info, Outdure will provide you a surface design layout, a frame design if desired and a detailed shopping list of all the materials required, including RRP.

5. WHERE TO BUY

Outdure will notify your preferred retailer (merchant) of your project with your material list. For a comprehensive list of our resellers please visit 'Where to Buy' on our website.

6. PAYMENT AND DELIVERY

The retailer will take payment and organise dispatch and delivery with you directly

7. SUPPORT

Outdure technicians will be available to talk or video call installers at any stage of the process Please register your warranty with Outdure and follow maintenance guides

HOUSE 3 – ALL SEASONS LUXURY

Ankur and Sharon succeeded in defining the different spaces of their verandah from the dining area, sitting area, and outdoor fireplace by combining ResortDeck in SeaSalt with our porcelain vitrified Mineral Tiles in the Mist colourway.

We love this eclectic style, the juxtaposition of modern vs heritage and how they considered the vertical timber cladding as a complement to the deck design. Having said that, without QwickBuild, the integration of decking and tiles would have been complex and hard to achieve for the internal balcony. Taking into account the ultra-low deck height of 54mm over a suspended concrete slab and the extra time pressure, QwickBuild was the obvious solution for the structure.

SURFACES: MINERAL TILES - MIST +
RESORTDECK BOARDS & TRIM - SEASALT
FRAME: QWICKBUILD FOR COMPOSITE DECKING
+ QWICKBUILD FOR STRUCTURAL TILES - 28X28

OUTDURE'S STRUCTURAL EXTERIOR TILES ARE ALL PORCELAIN VITRIFIED. THE MINERAL SERIES IS PERFECT FOR A MODERN, MINIMAL DESIGN & THE STONE INSPIRE RANGE HAS A MORE CLASSIC MARBLE FINISH.

FOR THE ULTIMATE EASY CARE, LOW MAINTENANCE OUTDOOR SPACE YOU CAN ALSO SELECT FROM OUTDURE'S RANGE OF ULTRAPLUSH TURF WHICH CAN BE SUPPORTED ON QWICKBUILD USING OUR ALUMINIUM TURF BASEBOARDS AS PERFECTLY SHOWN HERE IN DEB & ANDY'S ALFRESCO COURTYARD FROM A PREVIOUS SEASON

"It's fantastic, it creates such a flush and seamless integration for indoor-outdoor flow. The big advantage is the ability to use different surfaces and to chop and change between the two."

ANTHONY GRONOW
– GRONOW CONSTRUCTIONS

If you like a bit of tech info...

For Ankur and Sharon, Outdure value-engineered the aluminium framework using a single layer of our 28mm integrated joist bearer profiles to get the decking and tiles to sit at the perfect height with the internal floor and underneath the schist fireplace.

HOUSE 4 – URBAN QUEENSLANDER

Despite having the largest deck area on The Block ever with a record breaking 1.5 kms of lineal decking boards, Jenny and Dylan both carpenters by trade were up to the task. For their surface, they chose ResortDeck in Havana to respectfully link the heritage architecture around their traditional Queenslander house with their modern, skillion roofed house. The mammoth task was made faster by pre-fabricating the QwickBuild aluminium framework.

The ResortDeck range is nail-free and splinter-free, plus there is no need for staining, painting or oiling

As with all the houses, the deck surfaces were fixed using Outdure's patented range of hidden fasteners, designed for durability from 304 stainless steel with high quality PP components.

"There is just no way we would ever have been able to finish the amount of decking in the time we had with the team we had unless it was with Outdure, it just couldn't have been done!"

JENNY – CONTESTANT

HOUSE 5 – INDUSTRIAL MEETS COUNTRY

With a view of the Macedon ranges, Oz and Omar's expansive outdoor living space includes an all-purpose basketball court, mini golf course, lap pool and of course alfresco deck. To complement the industrial materials of the new build, including the dark, modern interior kitchen with concrete finishings and sliding doors, Oz and Omar selected ResortDeck in Sunset because it looks like a freshly oiled hardwood timber deck with the extra benefits of low maintenance properties durability & dimensional stability.

RESORTDECK
SUNSET

SURFACE: RESORTDECK BOARDS & TRIM - HAVANA
FRAMING: QWICKBUILD FOR COMPOSITE DECKING - 45X45

Outdure make it easy to achieve that perfect indoor-outdoor flow

Once again, with the use of QwickBuild as the framing system, the contestants were able to create that perfect indoor-outdoor flow with the deck feeling like an extended part of the inside living room.

As with all the houses, Outdure worked with the contestants, listened to their requirements then provided a design including a detailed layout of how the surfaces should be laid to ensure optimum use of materials for the deck area - including exact materials required and fastenings.

It is important to remember that Outdure surfaces can be installed using traditional support and framing systems. But, also provided as part of the complimentary design service is a customised, easy to follow frame layout with the perfect configuration for the deck height and substrate.

"The planning session and colour selection Omar and I did was so simple it really allowed us to get the look we were always wanting, we wanted a certain flow from inside to outside and colour palette.

From the moment we did our planning session with Outdure we knew our outdoor entertainment area would look incredible"
